Introduction to Programming Languages CECS130

Lab #7.

Programming assignment (100 pts): Add additional functionality to your phonebook program from lab# 6. Make it possible for users to:

1) Alphabetically sort the list of entries by name (first or last).
2) Find a phone number for a given name.
3) Randomly select a friend from the phonebook for you to call.
4) Delete everyone from the phonebook at the same time.
